Introduction

An electronic display of a patient's medications must be able to support the complex information needs of a wide range of health care professions and settings. A successful display solution must therefore take those information needs into account whilst ensuring patient safety and promoting consistency across views and between systems.

A list of medications is expected to be one of many ways of displaying medications information for a single patient. The information required for a medication review will vary for different contexts so guidance is provided for the needs that are common to all kinds of medications review. This list of medications forms only part of the Medications Management views and tools that would be available in a clinical application.

Important

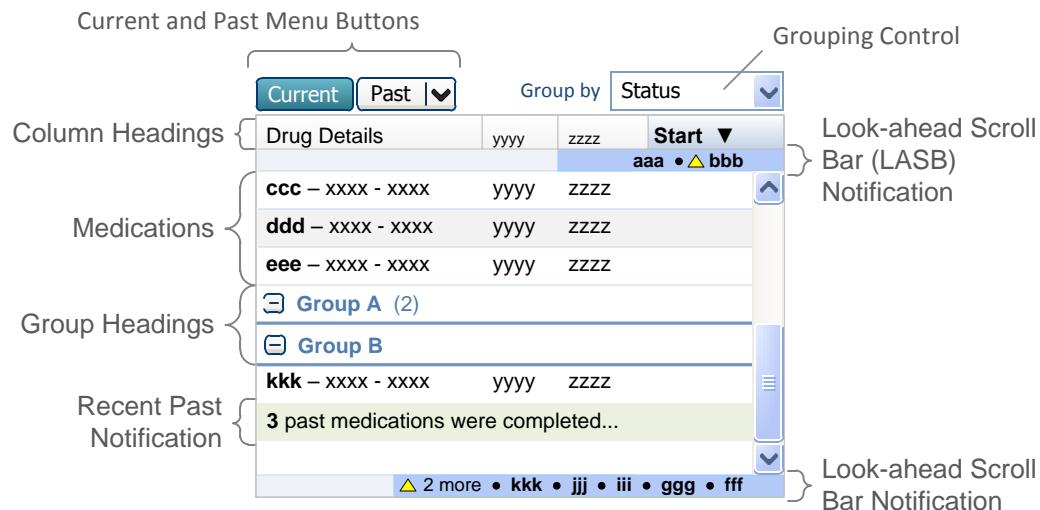

Although it contains all of the guidance points, this document omits supporting information and is therefore not intended as a substitute for the full NHS CUI documents *Medications List*¹. Refer to that document for the definitive statement of the design guidance in this area.

The visual representations used to display the guidance are illustrative only. Stylistic choices (for example, display font used), unless otherwise specified, are not part of the guidance and are therefore not mandatory requirements.

¹Medications Management – Medications List – User Interface Design Guidance (v1.0.0.0)

Structure and Layout

This simplified diagram shows some of the elements of a Medications List View:

Important

For the sake of brevity, illustrations in sections other than the *Look-Ahead Scroll Bar section* omit LASB notifications. Refer to that section for specific guidance on reserving space for, and displaying, LASB notifications.

Structure and Layout

Tabular Layout

MEDv-020

Present medications as lines of text within rows in a tabular format where each row represents one medication

Mandatory

temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amiofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010

composite column

MEDv-141

Use composite columns to minimise the display of blank cells for some rows (that is, avoid placing each individual data point in a separate column)

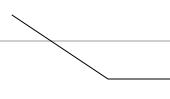

Recommended

Guidance

Structure and Layout

Indicating List Length

Drug Details	Status	Start Date ▼
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010

space

MEDv-142

When the list is scrolled to the end, display a space at the bottom of the list with a height equivalent to a line of text

Recommended

Structure and Layout

Gridlines and Row Formatting

temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010

Subtle gridlines between rows

MEDv-021

Avoid the use of strong grids and strong vertical lines. (Use subtle methods to support distinguishing between rows in the list)

Mandatory

MEDv-022

Use subtle alternate row shading

Recommended

MEDv-143

Use at least alternate row shading or lines between rows

Mandatory

MEDv-144

When using alternate row shading, ensure that colour and brightness of the background does not interfere with the readability of the foreground text

Mandatory

MEDv-145

Supplement alternate shading with 1 point pale lines between rows

Recommended

Structure and Layout

Displaying Icons for Drug Details

Drug Details column		
glyceryl trinitrate – 400 micrograms per dose – sublingual spray – DOSE 1 to 2 puffs – sublingual – as required – maximum 3 doses in 15 minutes	Started	28-May-2010
lansoprazole – orodispersible tablet – DOSE 30 mg – oral – once a day	Started	27-May-2010
dalteparin – 10,000 units per 1 mL – injection – DOSE 10,000 units – subcutaneous – twice a day	Started	27-May-2010

icon

MEDv-023

Support the display of icons
following the text of the Drug
Details column in the
Medications List View

Mandatory

Note The lettered squares that
have been used to represent icons
are placeholders only and do not
form part of the guidance

Structure and Layout

Empty Lists

Drug Details	Status	First Administration
<i>There are no current medications for this patient</i>		

MEDv-146

Display a message when a list is empty (for example, when there are no current medications)

Mandatory

co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010

MEDv-147

Provide a column that contains status information including information that defines whether the medication is 'current' or 'past'

Mandatory

MEDv-148

Provide a column that contains drug details according to *Medication Line*¹ guidance

Mandatory

¹Medications Management – Medication Line – User Interface Design Guidance (v2.0.0.0)

Columns

Mandatory Columns

Drug Details	Status	Start Date ▼
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010

MEDv-149

When displaying current medications, provide a column that contains an initiation date (such as the date of the first planned administration). The examples in this document show a Start Date column

[Mandatory](#)

Status	Drug Details	End Date ▲
Completed	hydrochlorothiazide – tablet – DOSE 100 mg – oral – 4 times a day	26-May-2010
Discontinued	methyldopa – tablet – DOSE 250 mg – oral – twice a day	25-May-2010
Completed	furosemide – tablet – DOSE 40 mg – oral – once a day	24-May-2010

MEDv-150

When displaying past medications, provide a column that contains a stop date (such as the date of the last administration or the date that the medication was discontinued). The examples in this document show an End Date column

[Mandatory](#)

Guidance

Columns

Date Columns

The specific information to display in date columns is not part of guidance because it needs to differ between tasks and contexts. Guidance is therefore provided for the relative placement of date columns.

Illustrations in this document use column headings with the following labels:

- **Start Date** for the start or initiation of a medication
- **End Date** for the end or completion of a medication

Drug Details	Status	Start Date ▼	End Date
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010	03-Jun-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010	09-Jun-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010	06-Jun-2010

MEDv-154

Maintain consistent placement of date columns relative to one another and relative to the Drug Details column in both current and past medications

Mandatory

MEDv-151

When an end date column is displayed, place a start date column before (to the left of) the end date column

Mandatory

MEDv-152

When an end date column is displayed, and there is no duration column, place a start date column adjacent to the end date column

Recommended

Columns

Date Columns

Drug Details	Status	Start Date ▼	fixed width	fixed width	End Date
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010	03-Jun-2010

co-amilorfruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010	06-Jun-2010		

MEDv-153

Use fixed width columns for dates

Mandatory

Guidance

Columns

Column Headings

Drug Details	Status	Start Date ▼	End Date
--------------	--------	--------------	----------

MEDv-155

Label columns with text that describes the contents unambiguously and succinctly (such as, 'Status', 'Date Prescribed' or 'First Administration')

Recommended

MEDv-156

Use a unique heading for each column

Mandatory

Columns

Composite Columns

Review and End Dates ▾
Review 06-Jun-2010 End 12-Jun-2010
Review 08-Jun-2010 End 08-Jun-2010

MEDv-027

Allow columns to contain more than one attribute for a single medication

Mandatory

MEDv-157

When combining two attributes that have the same data type (such as dates), include labels for both attributes in the column heading

Mandatory

MEDv-158

When combining two attributes that have the same data types (such as dates), include labels for both attributes within the cell

Mandatory

Guidance

Columns

Constraining Dimensions

MEDv-159

Maintain the relative proportions of columns such that the Drug Details column is the widest

Mandatory

MEDv-161

Define minimum widths for all columns

Recommended

widest column

Drug Details	Status	Start Date ▼	End Date
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010	03-Jun-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010	09-Jun-2010
co-amilorfruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010	06-Jun-2010

limited number of columns

MEDv-160

Avoid the need for horizontal scrolling by limiting the number of columns visible at any one time

Mandatory

Status

	Status	Star
Not Started	29-I	
Started	25-I	
Started	24-I	

MEDv-162

Ensure that all medications have a status value and the status cannot be blank

Mandatory

MEDv-163

Limit status descriptions to short phrases, preferably no more than two words

Recommended

MEDv-042

Display the status of each medication in bold

Mandatory

	Status	Star
Not Started	29-I	
Verified		
Started	25-I	
Not Verified		
Started	24-I	
Verified		

MEDv-164

Allow status to be supplemented with additional information (such as pharmacy verified)

Recommended

MEDv-165

Use the status description to differentiate between medications that have no recorded administration events and those that have

Mandatory

Guidance

Status

	Status	Star
	Started	25-I

MEDv-167

Assign a status of ‘Started’ to medications that have an administration event recorded and have further scheduled administrations

Recommended

	Status	Star
	Not Started	29-I

MEDv-168

Assign a status of ‘Not Started’ to medications that have an administration scheduled and a start date in the future

Recommended

Status	Drug Details
Completed	hydrochl

MEDv-170

Assign a status of ‘Completed’ to medications that have administration events recorded according to their schedule (within tolerances) and have an end date in the past

Recommended

Status	Drug Details
Discontinued	methyld

MEDv-171

Assign a status of ‘Discontinued’ to medications that were stopped on a date that preceded one or more of the scheduled administrations

Recommended

Status

	Status	Start Date
	Suspended on 30-May-2008	24-Jun-2008

MEDv-166

Support a status of 'suspended' and include medications with this status in current medications

Mandatory

MEDv-169

Assign a status of 'Suspended' to medications that are marked as not to be administered but which are intended to be resumed at a later date

Recommended

MEDv-024

Use visual design to draw attention to suspended medications

Mandatory

Guidance

Status

Drug Details	Status	Start Date ▼
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amiofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010

MEDv-025

Use visual design to distinguish a list of current medications from a list of past medications

Mandatory

MEDv-172

Define medications with a status of either 'Started', 'Not Started' or 'Suspended' as current medications

Recommended

Status	Drug Details	End Date ▲
Completed	hydrochlorothiazide – tablet – DOSE 100 mg – oral – 4 times a day	26-May-2010
Discontinued	methyldopa – tablet – DOSE 250 mg – oral – twice a day	25-May-2010
Completed	furosemide – tablet – DOSE 40 mg – oral – once a day	24-May-2010

MEDv-173

Define medications with a status of 'Completed' or 'Discontinued' as past medications

Recommended

Current and Past Medications

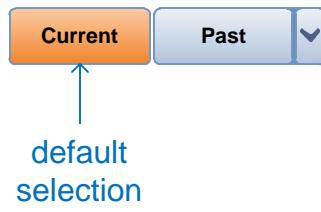

Controls

MEDv-063

Provide buttons for displaying current and past medications respectively in the Medications List View and label the buttons 'Current' and 'Past'

Mandatory

MEDv-062

Present the Medications List View with **Current** selected by default

Mandatory

MEDv-065

Do not allow **Current** and **Past** buttons to be selected simultaneously

Mandatory

MEDv-174

Ensure that either the **Current** or the **Past** button is selected at any one time

Mandatory

Guidance

Current and Past Medications

Controls

Example of Current and Past buttons

Example of Current and Past buttons in an alternative style

MEDv-064

Use the visual formatting of the **Current** and **Past** buttons to indicate which is currently selected

Mandatory

MEDv-066

Supplement the **Past** button in the Medications List View with a drop-down control for displaying, selecting and applying a filter on the past medications view

Mandatory

MEDv-067

Include an option for displaying all past medications in the drop-down control

Mandatory

Current and Past Medications

Current Medications

Drug Details	Status	Start Date ▼
temazepam – tablet – DOSE 20 mg – oral – at night	Started	26-May-2010
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010

MEDv-099

By default, present current medications sorted reverse chronologically by a starting date, such that the most recent is first (top) in the list

Mandatory

MEDv-173

When displaying current medications, place the drug details in the first (furthest left) column

Mandatory

Current and Past Medications

Recent Past Notifications

Drug Details	Status	Start Date ▼
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilorfruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010
2 past medications were completed or discontinued in the last 48 hours		

MEDv-074

When displaying current medications, display a notification for medications that have been completed or discontinued within a specified time interval from the current time

Mandatory

MEDv-174

Use formatting to distinguish the recent past notifications from medications in the list

Recommended

Current and Past Medications

Recent Past Notifications

2 past medications were completed or discontinued in the last 48 hours

Time interval

MEDv-075

Clearly display the time interval
within the recent past notification

Mandatory

2 past medications were completed or discontinued in the last 48 hours

↑
count

MEDv-077

Display a count of the number of
recently past medications within
the recent past notification in the
medication list

Mandatory

Current and Past Medications

Past Medications

MEDv-175

When displaying past medications, place the status column first (furthest left) and the Drug Details column second

Mandatory

First Column Status		Second Column Drug Details	
Status	Drug Details		End Date ▲
Completed	hydrochlorothiazide – tablet – DOSE 100 mg – oral – 4 times a day		26-May-2010
Discontinued	methyldopa – tablet – DOSE 250 mg – oral – twice a day		25-May-2010
Completed	furosemide – tablet – DOSE 40 mg – oral – once a day		24-May-2010

MEDv-100

By default, sort medications reverse chronologically by end date (or equivalent) such that the most recent is first (top) when the filter is set to 'Past' in the Medications List View

Recommended

Filtering

Filtering Past Medications

MEDv-069

When a filter is applied to past medications in Medications List View, the Past button should indicate that it is currently selected

Mandatory

Status	Drug Details	End Date ▲
The total list (54) is filtered to show: Past 2 months (3)		Remove Filter
Completed	hydrochlorothiazide – tablet – DOSE 100 mg – oral – 4 times a day	26-May-2010
Discontinued	methyldopa – tablet – DOSE 250 mg – oral – twice a day	25-May-2010
Completed	furosemide – tablet – DOSE 40 mg – oral – once a day	24-May-2010

MEDv-070

When a filter is applied to past medications in the Medications List View, display a filter notification at the top of the list below the column headings and above the scroll bar (thus ‘pushing’ the list of medications down a line)

Mandatory

Filtering

Filtering Past Medications

The total list (54) is filtered to show: Past 2 months (3)

Remove Filter

Control for removing a filter

MEDv-068

When a filter notification is displayed, include a control for removing the filter within that notification

Mandatory

MEDv-071

Display a description of the filter in use within the filter notification in the Medications List View

Mandatory

The total list (54) is filtered to show: Past 2 months (3)

Remove Filter

↑
count of
unfiltered total

↑
count of
filtered total

MEDv-072

Include a count of the number of medications displayed and a count of the total (unfiltered) number of past medications in a filter notification

Recommended

MEDv-176

Clearly label the counts (number of medications displayed and total unfiltered number) with text that allows them to be differentiated

Recommended

Look-Ahead Scroll Bar

A look-ahead scroll bar (LASB) is a standard scroll bar that is supplemented with notifications at the top and bottom to indicate that there are items in the list that are not currently visible.

Diagram of a Medications List View

MEDv-177

When displaying a list of current or past medications, and the scroll bar is active because the list is longer than the space available to display them, provide a clear indication that there are medications out of view

Mandatory

MEDv-178

When displaying current medications, supplement the standard scroll bar with notifications that display the names of drugs that are out of view. This document refers to this kind of scroll bar as a look-ahead scroll bar (LASB)

Recommended

Guidance

Look-Ahead Scroll Bar

Layout

Drug Details	yyyy	zzzz	Start ▼
ccc - xxxx - xxxx	yyyy	zzzz	
ddd - xxxx - xxxx	yyyy	zzzz	
eee - xxxx - xxxx	yyyy	zzzz	
fff - xxxx - xxxx	yyyy	zzzz	
ggg - xxxx - xxxx	yyyy	zzzz	
hhh - xxxx - xxxx	yyyy	zzzz	

MEDv-179

When displaying a LASB, reserve a space at the top and bottom of the list for look-ahead notifications

Mandatory

Status	Start Date ▼	aspirin • paracetamol

MEDv-180

Use a pale solid background colour for the space reserved for look-ahead notifications that is sufficient to distinguish the space from the background of the list

Recommended

Look-Ahead Scroll Bar

Grouping

Drug Details	Status	Start Date ▼
		aspirin • paracetamol
[+] Rectal (1)		
[+] Intravenous (3)		
- Inhaled		
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010

Example in which the first group in the list has been scrolled out of view. This group contains aspirin and paracetamol.

MEDv-181

When grouping is applied, and there is a collapsed group out of view, display drug names in the look-ahead scroll bar for any drug that is out of view, irrespective of whether it is within a collapsed group or an expanded group

Recommended

MEDv-185

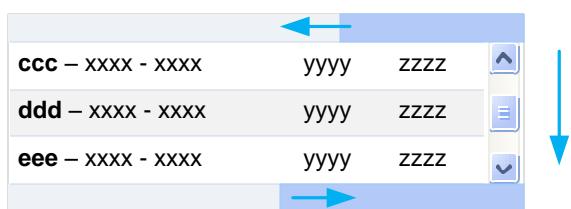

Do not include additional text or formatting to indicate grouping in the look-ahead notifications

Mandatory

Guidance

Look-Ahead Scroll Bar

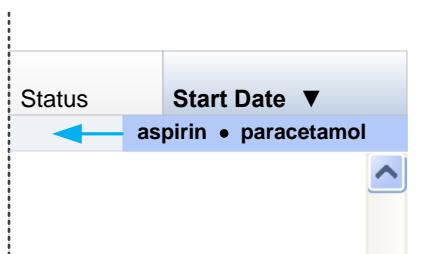

Interaction

MEDv-058

Update the look-ahead notifications dynamically in response to scrolling

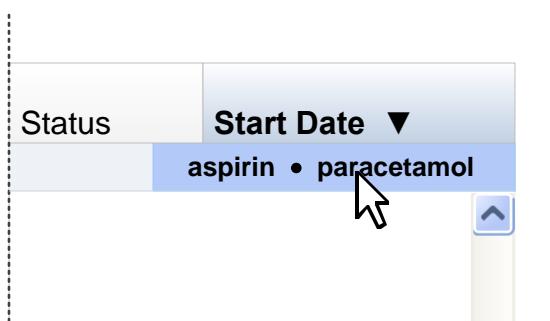

Mandatory

MEDv-059

Allow the look-ahead notification to change width dynamically to accommodate its contents up to the available width

Mandatory

MEDv-182

Do not allow the look-ahead notification to be used for navigation by clicking on areas of the notification, such as drug names or counts

Mandatory

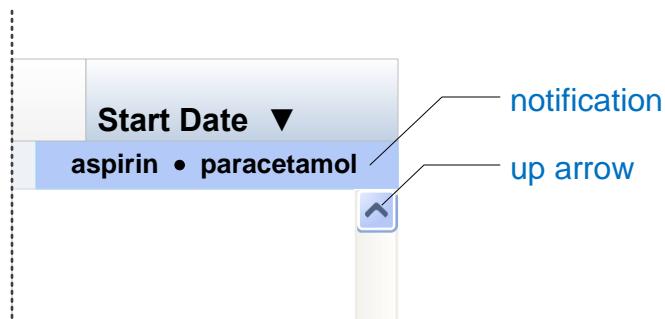

Look-Ahead Scroll Bar

Contents

aspirin • paracetamol

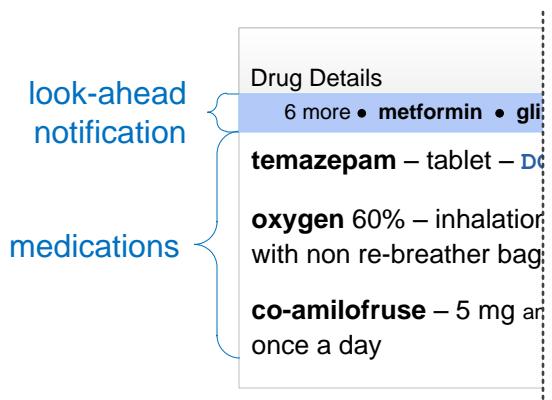

MEDv-044

Restrict the look-ahead notifications to a single line each
Mandatory

MEDv-043

The look-ahead notifications should be clearly joined to the 'up' and 'down' arrow controls of the scroll bar respectively
Mandatory

MEDv-045

Do not place controls or other notifications such that they separate the look-ahead notification from the medications in the Medication List View
Mandatory

Look-Ahead Scroll Bar

Order of Contents

1 • 2 • 3 • 4 • 5		
6 – xxxx - xxxx	yyyy	zzzz
7 – xxxx - xxxx	yyyy	zzzz
8 – xxxx - xxxx	yyyy	zzzz
9 – xxxx - xxxx	yyyy	zzzz
10 – xxxx - xxxx	yyyy	zzzz
11 – xxxx - xxxx	yyyy	zzzz
16 • 15 • 14 • 13 • 12		

MEDv-049

The order of both the items in the look-ahead notification and the medications list should always be the same

Mandatory

MEDv-048

The look-ahead notification is populated from right to left such that the next drug in the list appears closest to the scroll bar

Mandatory

oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amiofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – 4 more • paracetamol • atenolol • ramipril • clopidogrel • fluticasone • tiotropium • salbutamol	Started	24-May-2010

MEDv-183

If any of the drug name text (other than the letter ascenders and descenders) is obscured by the boundaries of the list, include that drug in the look-ahead notification

Recommended

Look-Ahead Scroll Bar

Counts

continuous – with non re-breathe
co-amilofruse – 5 mg and 40 mg DOSE 5 mL – oral – once a day
salbutamol – 100 micrograms p inhaler – DOSE 2 puffs – inhaled
4 more • paracetamol • atenolo

MEDv-052

When there are more items than can be displayed in the look-ahead notification for current medications, display as many as possible and end the list with a count of the remaining items that could not be displayed

Mandatory

continuous – with non re-breathe
co-amilofruse – 5 mg and 40 mg DOSE 5 mL – oral – once a day
salbutamol – 100 micrograms p inhaler – DOSE 2 puffs – inhaled
▲ 4 more • paracetamol • atenolo

MEDv-053

When a count is displayed in a look-ahead notification and one or more of the medications included in that count have decision support alerts, display a decision support alert icon next to the count

Mandatory

Current Medications

continuous – with non re-breathe
co-amilofruse – 5 mg and 40 mg DOSE 5 mL – oral – once a day
salbutamol – 100 micrograms p inhaler – DOSE 2 puffs – inhaled
4 more • ▲ paracetamol • atenolo

MEDv-055

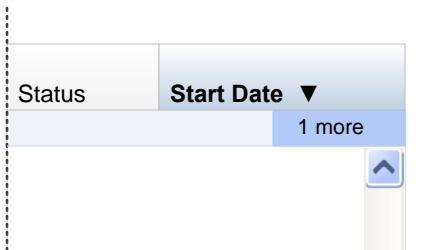

When displaying current medications only, show drug names and decision support alert icons in the look-ahead notification

Mandatory

Guidance

Look-Ahead Scroll Bar

Counts

MEDv-050

Where exceptionally long drug names require more space than is available in a look-ahead notification, display a count instead (as for past medications)

Mandatory

MEDv-051

Do not truncate or abbreviate drug names in the look-ahead notification

Mandatory

Past Medications

Completed		hydrochlorothiazide – tablet – DOSE 100 mg – oral – 4 times a day
Discontinued		methyldopa – tablet – DOSE 250 mg – oral – twice a day
Completed		furosemide – tablet – DOSE 40 mg – oral – once a day
3 more		

counts

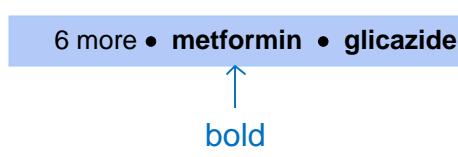

MEDv-054

When displaying past medications only, display counts in the look-ahead notification and not drug names

Mandatory

Look-Ahead Scroll Bar

Format of Contents

MEDv-186

Display drug names in bold and in black text by default

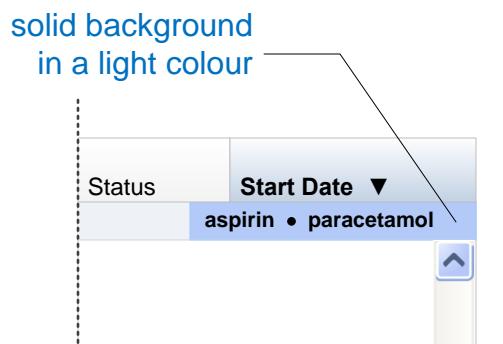

Mandatory

MEDv-187

Display counts and descriptive text (such as 'more') in normal weight font

Mandatory

MEDv-188

Use a light solid background colour for the notifications that is both sufficiently different from the colour in the space reserved for notifications and sufficiently different from the black text in the notification

Recommended

MEDv-189

Do not use a border in a dark colour or with a weight greater than 1 point for a look-ahead notification

Recommended

Look-Ahead Scroll Bar

Format of Contents

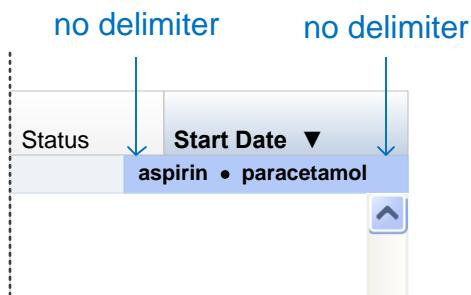

aspirin • paracetamol

delimiter
↑
delimiter

MEDv-056

Use a delimiter that is unlikely to be interpreted as a character or number (such as a black dot ‘•’), with a space either side to separate drug names and to separate the count from drug names

Mandatory

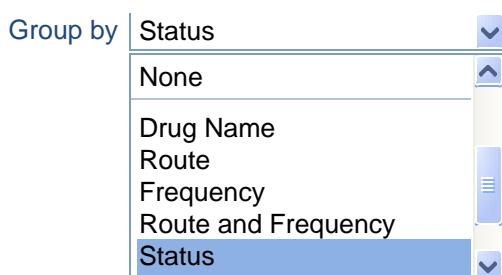

MEDv-184

Do not use leading or trailing delimiters

Mandatory

Grouping

Grouping Control

MEDv-084

Provide a standard drop-down list for displaying, selecting and applying grouping to the medications list

Mandatory

MEDv-085

Label the grouping control 'Group by'

Mandatory

MEDv-190

Include an option in the drop-down list to set the grouping to 'None'

Mandatory

Guidance

Grouping

Displaying Groups

Grouping

Group Headings

group heading			
<input checked="" type="checkbox"/> Inhaled			
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010	
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010	
<input checked="" type="checkbox"/> Oral	Started	24-May-2010	
co-amilorfruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010	

MEDv-086

Display clear and prominent headings for each group category

Mandatory

MEDv-090

Do not display group headings for empty groups

Recommended

Grouping

Null Groups

'null' group

<input type="checkbox"/> (No Form Specified)		
clopidogrel – DOSE 75 mg – oral – once a day	Started	24-May-2010
<input type="checkbox"/> Tablet		
temazepam – tablet – DOSE 20 mg – oral – at night	Started	25-May-2010
<input type="checkbox"/> Solution		
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010

MEDv-091

Provide 'null' groups where necessary to support the display of medications that do not have a value for the attribute being used to group the medications

Mandatory

MEDv-194

Display the label for a 'null' group heading in brackets

Mandatory

MEDv-195

Display 'null' groups at the top of the list of groups

Recommended

Guidance

Grouping

Expand and Collapse

control for expanding a collapsed group

The screenshot shows a medication record. At the top left is a plus sign icon followed by the text 'Oral (2)'. Below it is a minus sign icon followed by the text 'Inhaled'. To the right of 'Inhaled' is a detailed description of the medication: 'salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required'. To the right of the description are the status 'Started' and the date '24-May-2010'.

MEDv-092

Provide controls for expanding and collapsing individual groups. Place these controls at the beginning of the group heading

Mandatory

MEDv-089

When a group is collapsed, supplement the group heading with a number representing a count of medications within that group

Mandatory

The screenshot shows a medication record with a context menu open over the 'Inhaled' group heading. The menu options are 'Collapse All Groups' and 'Expand All Groups'. A cursor arrow points to the 'Collapse All Groups' option.

MEDv-196

Support the selection of group headings and the display of a context menu that includes options for collapsing and expanding all columns

Mandatory

Grouping

Combining Group Names

<input type="checkbox"/> Analgesic (2)
<input type="checkbox"/> Analgesic; Non-steroidal Anti-inflammatory (1)
<input type="checkbox"/> Non-steroidal Anti-inflammatory (1)

MEDv-198

Display each medication in only one group (do not duplicate medications so that they can be displayed in more than one group)

Mandatory

a combined group

MEDv-197

When one or more medications belong to more than one group (such as analgesic and non-steroidal anti-inflammatory), create a new group and label it with the group names combined (such as 'Analgesic; Non-steroidal Anti-inflammatory')

Mandatory

in sort order

<input type="checkbox"/> Analgesic (2)
<input type="checkbox"/> Analgesic; Non-steroidal Anti-inflammatory (1)
<input type="checkbox"/> Non-steroidal Anti-inflammatory (1)

semi-colon

MEDv-199

When combining group names, display the names in the same order as they would appear in a list that is sorted by that attribute

Mandatory

MEDv-200

When combining group names, separate the labels with a semi-colon

Recommended

Guidance

Sorting

Sorting Control

sort order: most recent first

1

Drug Details	Status	Start Date ▼
oxygen 60% – inhalation gas – RATE 15 L per minute – continuous – with non re-breather bag	Started	25-May-2010
co-amilofruse – 5 mg and 40 mg in 5 mL – solution – DOSE 5 mL – oral – once a day	Started	24-May-2010
salbutamol – 100 micrograms per dose – metered dose inhaler – DOSE 2 puffs – inhaled – four times a day as required	Started	24-May-2010

sort order: most recent last

MEDv-124

Maintain the selection of a medication when switching between views of a patient's medications (such that a medication selected in a Medication List View is automatically selected when switching to the Drug Administration View)

Recommended

MEDv-125

Maintain the selection of a medication when applying or changing a grouping or a sort order and ensure that the selection remains visible

Mandatory

Selection

Supporting Selection

Drug Details	Status	Start Date ▲
line 1		
line 2		
line 3		
line 4		
line 5		
line 6		
line 7		

MEDv-126

Support the selection of multiple items using CTRL and click for discrete selections, and SHIFT and click for contiguous selections

Mandatory

MEDv-127

Support keyboard-only equivalents such as SHIFT and arrow key for contiguous selection and the CTRL and SPACEBAR to toggle select and deselect when making non-contiguous selections

Mandatory

MEDv-203

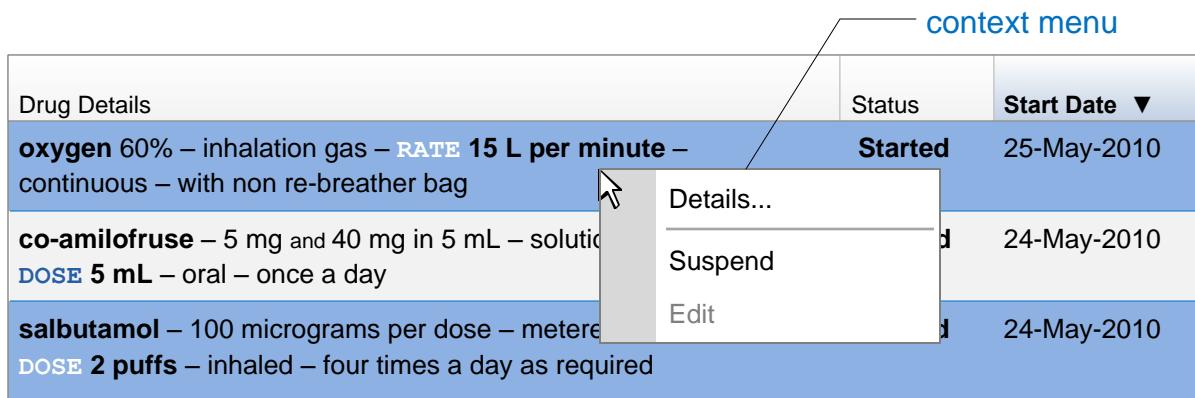

When an action is applied to more than one medication, display a summary of the selected medications before allowing the user to complete the action

Mandatory

Guidance

Selection

Context Menu

MEDv-128

Support the display of a context menu for selected medications in the Medications List View (for example, by right-clicking)

Mandatory

MEDv-129

In the context menu, provide appropriate actions and options

Mandatory

MEDv-130

In the context menu, support actions with icons where appropriate

Recommended

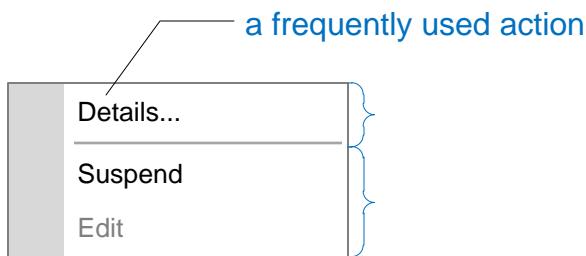

MEDv-131

In the context menu, grey out actions that are unavailable or disallowed for one or more of the current selections

Mandatory

Selection

Context Menu

MEDv-136

Include an option to access all details for one medication in the context menu

Mandatory

MEDv-132

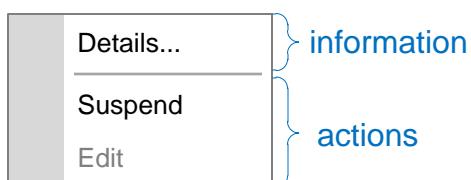

In the context menu, define a consistent and static order of menu items in which frequently used actions are prioritised by placing them higher in the list

Mandatory

MEDv-135

In the context menu for selections in the Medications List View, provide an option for displaying all details for the selected medication

Mandatory

MEDv-133

In the context menu, group similar options so that the direct actions, actions that permit addition of information and actions that display more information, are each grouped together

Mandatory
